WHY US?

At AGILEKODE, we're not just a team of professional developers; we're passionate coders dedicated to infusing creativity into every project, specializing in Web and Mobile Applications. We bring your visions to life with precision, ensuring each line of code embodies your project's essence.

Our commitment to excellence is evident in our innovative solutions, viewing innovation as a continuous journey. We prioritize building lasting client relationships, offering a blend of personalized attention and team expertise, and are dedicated to finding optimal solutions for complex challenges.

Our ENGAGEMENT MODELS

A fixed-price model is suitable for clients with clear project details for the software, design, and features. All requirements are transparent.

Fixed Price

With dedicated resources, the client handles the project as they wish. You assign the tasks as per the priorities You decide! Billing for this model.

Dedicated Resource

Clients prefer this model when they only need to make a certain amount of changes at the beginning or at any stage of the project.

GOWASHMYCAR

Product Overview: GoWashMyCar is London's most convenient mobile car wash and valeting service, offering
quality, eco-friendly, on-demand service.

Responsibilities: Worked as a full-stack developer on this project including:

- Build a backend with Ruby on Rails and used activeadmin, devise, cancancan, twilio, sidekiq, stripe, and other gems.
- Build the front end with React and integrate with the backend.

JAWALY CHATWOOT CLONE

Product Overview: 4jawaly offers hosting solutions and specializes in mobile app hosting and SMS services, ocusing on innovation.

Responsibilities: Worked as a full stack on this project, and replicated the Chatwoot Facebook integration on a separate stand-alone application. The work includes:

- Build a middleware in Ruby on Rails that acts as a bridge between Chatwoot and a standalone application. The middleware is responsible for calling Chatwoot APIs and sending/receiving responses.
- Build a front end in AngularJS and replicate all the functionalities provided on Chatwoot including Facebook sdk, channel creation, real-time chat, etc.

DROPSHIPT (SHOPIFY APP DEVELOPMENT + THEME CUSTOMIZATION)

Product Overview: Generate a dropshipping store with Dropshipt. Paste a product link and Dropshipt will do the rest! Building a store is boring and time-consuming.

Responsibilities: Worked as a full stack on this project and accomplished the following:

- Build dropship shopify application in Ruby on Rails https:/apps.shopify.com/dropshipt
- Worked on front-end development and did a lot of customization in shopify liquid
- Build the webpage through WebFlow.

TESTIMONAL

What our Clients say about us.

★★★★★

Muhammad is a very skilled developer who solves problems creatively and efficiently. He worked as an effective member of our team for many months and I recommend him very highly.

Andrew N.

★★★★★

Muhammad Adeel Anwar is a fantastic developer, not only Rails but JavaScript as well. He got right to work on our Chrome extension, and ran with it, completing 150% of deliverables (yes, more than we planned at the start!). Highly recommended.

Philip B. | Senior Product Manager

★★★★★

I hired Muhammad Adeel to customize Chatwoot, he customized the codebase and added new features exactly like I wanted. He added the features in Chatwoot that people wanted to be added for 2 years. His code follows the application patterns of Chatwoot and the UI also looks Chatwoot's native. He's an amazing Full Stack with variety of skillset to work on development of almost any project.
I highly recommend him.

Muhammad Shaheer H.
